How the World Gets High

A Global Tour of Sacred Mushrooms, Amazon Vines, Mad Honey, Desert Toads and the New Science of Psychedelic Healing

TJ Toce

Humans have been changing their own minds for longer than we have had writing or the wheel. This is the story of how, told kingdom by kingdom.

★★★★★ 14 five-star reader reviews on Amazon

ABOUT THE BOOK

In 401 BCE, ten thousand Greek soldiers ate wild honey in the mountains of Turkey and spent three days flat on their backs. Xenophon wrote it down: the oldest trip report in Western literature.

This illustrated tour pairs the history of mind-altering fungi, plants and animals with today's science and an honest look at the risks.

SIX KINGDOMS, ONE BOOK

Fungi	Cacti	Vines
Amphibians	Fish	Honey

WHY IT SELLS
